**Re: Balloon Buster Amusement Game Skill Version A.1.9.3**

Dear Mr. Newell,

Thank you for submitting the Balloon Buster amusement game, manufactured by LAI games, to us for review. In the information submitted, it was noted that the software has been modified in this version of Balloon Buster. Specifically, this version is a skill only version that does not have the prize win management options that are available in other versions. In this software version, settings P08 and P09 are not available.

It is my understanding the game plays as follows:

The object of the Balloon Buster Game is to align the dart so it fits into one of the holes in front of a balloon. If the player positions the dart in the hole and pops the balloon, the prize hanging underneath that balloon is dispensed. The Balloon Buster Game price per play can be adjusted based on the location and value of the prizes. You were advised that the maximum wager is \$3.50 and maximum prize is \$500 for locations where minors are allowed to play in Washington.

The Balloon Buster game skill version A.1.9.3 meets the definition of an amusement game (RCW 9.46.0201) and is approved for use as a Group V, hand/eye coordination (WAC 230-13-035) amusement game in Washington State. Licensees operating this game must be able to locate the software version and display it to Commission staff during an inspection

Please be advised that any modifications to the Balloon Buster amusement game software or associated equipment must be provided to us for additional testing and review. In addition, amusement games operated in Washington must not have settings that allow the operator to control the outcome of the game (auto percentaging). The approval of this equipment may be rescinded at any time if problems are found by the Commission or changes to the Washington Administrative Code (WAC) impact this approval. If you have any questions or concerns, please contact Sonja Dolson at (253) 671-6283.

Sincerely,

Mark Harris  
Assistant Director  
Field Operations Division
