**RE: Nexus Command Game Manager 2 Progressive Table System – Submission #2082**

Dear Mr. Sheehan,

Thank you for requesting approval of the Nexus Command Game Manager 2 Progressive Table System. We have completed our review.

The Nexus Command Game Manager 2 Progressive Table System is a progressive jackpot system approved for use in Washington State. The approval is contingent on the following requirements:

Manufacturer Requirements:

- The Game Manager 2 server requires a unique username and password at login
- All unused ports on the Game Manager 2 server and Dealer Terminals are sealed.
- That there are no external connections allowed on the Game Manager 2 system to ensure the system remains closed. Any devices connected to the system should have all wireless and Bluetooth settings disabled.
- Access to the Game Manager 2 server is limited to specific and necessary personnel.
- Verify at installation the Game Manager 2 progressive system is setup to operate as a standalone networked system. Security precautions should be implemented during the installation phase.
- All game rules and progressive meter settings displayed on the table monitors and Game Manager 2 server must be verified by the Commission at installation. Notification to the Washington State Gambling Commission must be made prior to the first installation in Washington and each installation thereafter so arrangements may be made for Agent inspection/review. Please provide a list to include specific locations, dates and times this system will be installed at least 10 business days prior to installation. Send the list to Sonja Dolson at [sonja.dolson@wsgc.wa.gov](mailto:sonja.dolson@wsgc.wa.gov).

- If the system is used to connect different card games on multiple tables to one progressive jackpot, the system must comply with WAC 230-15-685 and only link games with the same probabilities.
- No internet connection is allowed on the Game Manager 2 server or the Dealer Terminals.
- Only reviewed and tested components of Game Manager 2 progressive system can be connected to the system server. No other programs can be run on the system server.
- Only connect external tools to the Game Manager 2 system for standard maintenance as authorized by WAC 230-16-151.
- Update your game rules for card games that will use the Game Manager 2 progressive system.
- Only licensees operating the system shall have access to make changes to the system such as posting and/or choosing pay tables, or posting current jackpot amounts.

House-Banked Card Game Licensee Requirements:

- Ensure when connecting a progressive jackpot on different card games on multiple tables within your location, only one progressive jackpot is operated on a card game at a time. The card games must have the same probability of winning the jackpot prize, the same winning hand, and the progressive meter on each table must increase incrementally each time a wager is made.
- Maintain a closed gambling equipment system that is isolated from non-gambling systems and inaccessible from outside networks.
- Limit access to the Game Manager 2 server by providing individual access login/passwords. The access levels must be included in their internal controls. The Game Manager 2 server should reside off the casino floor in a secure area of the casino.
- Limit access to the Table Controller by requesting individual access cards from the manufacturer for necessary personnel only. The access levels must be included in their internal controls.
- Include any primary jackpot cap amounts in their internal controls.
- Ensure chips are placed on the center of the sensor to ensure all wagers are accurately recorded.
- Follow all progressive jackpot WAC rules when using this equipment.
- Ensure primary jackpot cap amounts and procedures for paying out jackpots when multiple jackpots are hit at the same time are included in their internal controls.
- Ensure they maintain records that account for all funds collected for progressive jackpot games.
- When using a progressive jackpot, you must require a specific wagering limit on the progressive wager (for example all progressive wagers must be \$1) to ensure all funds are accounted for.

Tribal Casino Implementation:

- Ensure internal controls are revised to include new equipment and procedures, and approved by Tribal Gaming Agency and concurred with by Washington State Gambling Commission.

- Ensure only Tribal casinos operating the system shall have access to the system to make changes such as posting and /or choosing pay tables, or posting the current jackpot amount.
- Ensure that wireless services are disabled on any computer connected to the system.

Any modifications made to the Nexus Command Game Manager 2 Progressive Table System must be submitted to us for additional testing and review. We reserve the right to investigate and reevaluate this equipment if we determine that such a review is necessary to ensure compliance with applicable rules or laws in Washington.

Thank you for your cooperation during this process. We appreciate your desire to comply with our regulations. If you have any questions regarding this matter, please contact me at (360) 486-3546.

Sincerely,

Tina Griffin
