RE: i-Deal Shuffler Version 3.8.084 and i-Verify Display Version 1.0.026

Dear Ms. Sherwood,

Thank you for requesting approval of the i-Deal shuffler upgrade with i-Verify Display. We have completed our review.

We are approving the i-Deal Single Deck Shuffler version 3.8.084 with i-Verify Display version 1.0.026 with the following requirements:

i-Deal Single Deck Shuffler v. 3.8.084:

- The dealer cannot access the i-Deal screen menu; only a supervisor or above should be able to access password protected areas of the screen menu.
- The Ethernet ports on the i-Deal were disabled and not operational during testing. Therefore, there should be no Ethernet connectivity on this shuffler in Washington State.
- Only authorized Bally technicians may use the Bally proprietary USB flash drives for updating software and diagnostic testing of the shuffler in compliance with WAC 230-16-151.

i-Verify Display v 1.0.026:

- Licensees who use the i-Deal with the i-Verify Display, must ensure all other players at the table have set their hands before using the i-Verify Display to set a player's hand "house way."
- Dealers must not access the i-Verify Display to reveal the dealer "house way" until all players at the table have set their hands or had their hand set "house way".
- Licensees and Tribal casinos must ensure the i-Verify Display can be viewed by surveillance as required in WAC 230-15-280 and Tribal-State Compacts.
- Only games approved for use with the i-Verify Display may be operated in WA.
