**RE: Submission #2085 Roulette Reader Board (RRB) v1.2.0 to be used with the Cammegh Mercury 360 Roulette Wheel**

Dear Ms. Hunter,

Thank you for requesting approval of the Roulette Reader Board ("RRB") to be used with the Cammegh Mercury 360 Roulette Wheel. We have completed our review.

The RRB is approved with the following requirements:

- Used with only the Cammegh Mercury 360 Wheel, Break Out Box version 1.24, Cammegh Eyeball and G-Kit approved on April 17, 2012; and
- All requirements noted in the April 17, 2012, Cammegh Mercury 360 Roulette Wheel and Cammegh Eyeball approval letter must be followed (see enclosure); and
- Cannot be operated with any other roulette wheel or external roulette wheel sensor; and
- The RRB PC cannot be physically accessible to any unauthorized person or the public; and
- The keyboard must be disconnected during play when operated with the Cammegh Mercury 360 wheel, Break Out Box version 1.24 and Cammegh Eyeball; and
- Both Cammegh Limited and Bally Technologies have valid manufacturer licenses.

The electronic signatures for RRB are as follows:

Software Component	Device	EagleCheck SHA-1
ITR-SignLoader.exe	Roulette Reader Board	784EA5A3B29ED9A3BD5BDAC55A3EA27A1746A207

Any modifications to the RRB must be submitted to us for additional testing and review. You will need to resubmit the equipment for testing before using a different version of the Cammegh equipment outlined in the April 17, 2012 approval letter. We reserve the right to investigate and reevaluate this equipment if we determine that such a review is necessary to ensure compliance with applicable rules and laws.

Thank you for your cooperation during this process. We appreciate your desire to comply with our regulations. If you have any questions regarding this matter, please contact me at (360) 486-3546.

Sincerely,

Tina Griffin  
Assistant Director  
Licensing, Regulation and Enforcement

RE: Mercury 360 Roulette Wheel, Cammegh EyeBall and Billboard Display

Dear Ms. Cammegh,

This approval letter is being issued to amend information to the March 7, 2012 approval letter. The Break Out Box (BOB) software version in the original letter was incorrectly identified.

Thank you for requesting approval of the Mercury 360 Roulette Wheel, Cammegh EyeBall, and Billboard Display. We have completed our review.

The Mercury 360 Roulette Wheel, Cammegh EyeBall and Billboard Display are approved for use in Washington State with the following requirements:

- Recommend the Operators keep the rotor speed between 10-30 rpm for accurate display and recording of game outcome/ball drops.
- The keyboard and mouse must be disconnected from the Billboard controller during game play.
- All open ports on the PC box and the BOB be disabled or sealed to prevent unauthorized access to game results and event logs or unapproved network use.
- Provide information to the Operator on the minimum ball speed or rotations needed to provide a winning number result.
- Since the Cammegh Pit Boss was not submitted for testing, it may not be used in conjunction with the equipment.

The electronic signatures for the Billboard and Camera software are as follows:

SIGNATURE

File Name	SHA1 Signature
Billboard.exe (Version 1.127)	ODFFB972302031BAAF9FB88D6C7E2F95F9E1DBF
Roulette Camera.dll (Version 1.127)	5C1AB10EC984702DB725650D69FC280C83CFE1CE

The following components have the following version numbers that are included with this approval:

Guzunda software version 1.68  
BOB software version 1.24

Any modifications made to the Mercury 360 Roulette wheel, Cammegh EyeBall, or Billboard Display, software, or associated equipment must be submitted to us for additional testing and review. We reserve the right to investigate and reevaluate the equipment and software if we determine that such a review is required to ensure compliance.

Thank you for your cooperation during this process. We appreciate your desire to comply with our regulations. If you have any questions regarding this matter, please contact me at (360) 486-3546.

Sincerely,

Tina Griffin
