**RE: Elite e-FX Display, Advanced Reader Head, and Saturn Roulette Wheel-
Submission #2073**

Dear Ms. Sholer,

This approval letter is being issued to amend information to the October 7, 2016 approval letter. The Saturn Roulette Wheel version number was incorrectly identified. We have completed our review.

The Elite Display is approved for use with the ARH-2, and the Elite Display is also approved for use with the Saturn Wheel in Washington State tribal casinos. The approval is contingent on the following:

Manufacturer Requirements:

- Provide information to the Tribal casino on the minimum number of ball rotations needed to display a winning number result on the Elite Display.
- The Elite Display cabinet should remain locked to secure network, video, USB, and serial ports.
- Notification to the Washington State Gambling Commission (WSGC) must be made prior to the first installation in Washington and each installation thereafter so arrangements may be made for either a WSGC Agent or a Tribal Gaming Agency (TGA) Agent inspection/review. The signature of Elite Display and version number of the Saturn Wheel and/or ARH-2 must be checked by TGA or WSGC staff prior to being put into play. Please provide a list to include specific locations, dates and times this system will be installed at least 10 business days prior to installation. Send the list to Cathy Harvey at the following email address Cathy.Harvey@wsgc.wa.gov. Send a notice of the installation to the appropriate Tribal Gaming Agency for the casino location.

Tribal Casino Operators:

- Tribal casino dealers should ensure ball spins meet the standards for rotations/spins configurations as set by manufacturer for accurate display and recording of game outcome/ball drops.
- Tribal casinos should include in their internal controls a procedure if the ball spin does not meet the configuration setting and does not display the number on the Elite Display.
- The TGA must verify the signature of the Elite Display and the version numbers of the Saturn Wheel and/or ARH-2 are approved prior to being put into play.

We did not test the Elite Display with Gaming Floor Live media system.

The electronic signature for the Elite Display is listed below:

File Name	SHA1 Signature
e-fx-elite2_core-2.3.1_roulette-2.2.1_sicbo-1.4.0 thumb drive	bf92a192163e6d25cf8da7768f4635674d876a50

The following components have the following version numbers that are included with this approval:

ARH-2 version 1.6D

Saturn Wheel version 2.5.0

Any modifications made to the Elite Display, ARH-2, and Saturn Wheel must be submitted to us for additional testing and review. We have approved the use of the Elite Display with the ARH-2 and the use of the Elite Display with the Saturn Wheel to read and display the outcome of the gambling activity. We reserve the right to investigate and reevaluate this equipment if we determine that such a review is necessary to ensure compliance with applicable rules or laws in Washington.

Thank you for your cooperation during this process. We appreciate your desire to comply with our regulations. If you have any questions regarding this matter, please contact me at (360) 486-3546.

Sincerely,

Tina Griffin
Assistant Director
Licensing, Regulation and Enforcement Division
