

THREE CARD POKER® RULES

Three Card Poker uses a standard 52-card deck. There are three ways to play. The game allows the player to wager against the dealer, to wager only on the value of his own hand, or to wager both against the dealer and on the value of his own hand. The game must be used with a shuffler produced by Shuffle Master Inc.

Ranking of Hands

The ranking of the hands in Three Card Poker differs from traditional poker hands. In Three Card Poker, a STRAIGHT beats a FLUSH. Cards are ranked from highest to lowest as follows.

STRAIGHT FLUSH
THREE OF A KIND
STRAIGHT
FLUSH
PAIR

If a hand does not contain a pair or better, the hand that contains the highest ranking card(s) wins. Ace is high except in 3-2-Ace sequence.

Three Ways To Play

(1) *Playing Against the Dealer - ANTE WAGER*

The object when playing against the dealer is to get a three card poker hand with a value higher than the dealer's qualifying hand of a Queen or better. Players place an ANTE wager. After looking at their three card poker hand, players may fold or, if they believe their hand is high enough to beat the dealer's hand, they will place an amount EQUAL to the ANTE on the PLAY spot.

Playing Against the Dealer

- | | |
|---|--|
| • Player folds | LOSE |
| • When dealer does not play | PLAY is a PUSH
ANTE wins 1 to 1 |
| • When dealer plays and player's hand beats dealer's hand | PLAY wins 1 to 1
ANTE wins 1 to 1 |
| • When dealer plays and dealer's hand beats player's hand | PLAY is a loss
ANTE is a loss |

The ANTE BONUS is paid when a player is dealt one of the three highest ranking hands in the game. **The ANTE BONUS is paid regardless of the dealer's hand.**

(2) *Playing the Hand Value - PAIR PLUS*

The object of betting the PAIR PLUS wager is to receive a pair or better. If the player's hand contains a pair or better the player wins the PAIR PLUS wager. **Players receive PAIR PLUS payouts regardless of the dealer's hand.**

PAIR PLUS payouts are attached.

(3) *Playing Both - PAIR PLUS and ANTE*

When a player bets both the PAIR PLUS and the ANTE (including PLAY), he is playing against two separate paytables with two different criteria for payouts. In playing the ANTE wager, the object is to get a three-card poker hand that beats the dealer's qualifying hand of Queen or better. In playing the PAIR PLUS wager, the object is to receive a pair or better. **The ANTE and PAIR PLUS wagers do not have to be the same amount. Players receive the PAIR PLUS payouts regardless of the dealer's hand.** Players can wager anywhere from the table minimum to the maximum allowed bet on either spot. However, the PLAY wager must always equal the ANTE wager.

If the player has made the ANTE wager and the PAIR PLUS wager, he must make the PLAY wager or will forfeit both the ANTE and PAIR PLUS wagers.

*** Side bets between players are prohibited.**

RULES OF PLAY:

1. Three Card Poker Progressive is an optional progressive side bet.

4. The meter will be reseeded when the 100% award hits. The cost of the reseed has been factored in to the casino's mathematical advantage.
5. To begin each round, players must make their regular game's wager. They may optionally place any side bet wagers and the progressive wager. Players must place the progressive wagers on the sensor in front of their betting position. The sensor will light up.

6. Once all players place their bets, the dealer will press “COIN IN” on the keypad. The sensors will then light up, indicating a progressive wager. The dealer will then remove all progressive bets from the table.
7. The dealer then follows house procedures for dealing the regular game.
8. The dealer reconciles the standard wager, side bet wager, and progressive wagers at the same time. Follow the procedure in the next section for reconciling percentage pays from the progressive meter.
9. Progressive winners:
 - a. The percentage pays are paid from the progressive jackpot shown on the progressive meter.
 - b. Other hands are paid from the tray; they do not come off the meter.
 - c. In the event more than one progressive meter pay hits during the same round, see Appendix A attached for resolution of the progressive hands.
 - d. When a player has a progressive winner, the dealer shall press the appropriate hand button on the keypad. (If the hand button is pressed by accident, pressing it again will turn it off.)
 - e. The dealer shall then contact a supervisor.
 - f. Once the casino verifies the progressive win, the supervisor shall insert the key and rotate it to “JPH” and then press “J-pot” button. This records the win onto the Game Manager. House procedures are then followed for paying the prize. (Reviewing the monitor connected to the Game Manager will show the prize amount to be paid, and pressing the “money bag” icon will print a win page, which can be used to help record the payout for accounting.)
 - g. Returning the supervisor key to the “Run” position will restore normal operation of the table, and adjust the meter appropriately for the prize won.
 - h. When the dealer reconciles all action, he presses “Game Over.” This resets the system to begin the next hand.
 - i. Once the “J-pot” button is pressed, the prize is logged into Game Manager. If the progressive pay needs to be backed out at this point, the award will need to be manually backed out using the Game Manager manual adjustment feature.
10. Envy Bonus:
 - a. A player making the progressive side wager also qualifies to win an envy payout. If another player at the table hits a hand associated with an envy pay, all other players who made the progressive side bet win the envy pay. The player hitting the hand receives the normal prize pay only, but does NOT receive the envy pay.

Rule of thumb: You can't win an envy bonus pay from yourself, or the dealer. If one player is playing more than one hand and achieves a triggering envy pay, they would be paid the envy bonus on their other hands, as the hands are viewed as independent of each other.

- b. If a player's hand triggers an envy payout, the dealer will leave the hand face-up on the layout; otherwise, the dealer will lock up the cards. The dealer will then move on to the next player.
- c. The dealer pays any Envy Bonuses at the end of the round. In the event that more than one player is involved in a qualifying envy pay, then all players win multiple envy payouts.

Appendix A

Reconciling Multiple Progressive Meter Wins

In the event more than one progressive hand, payable from the progressive meter, hits at the same table during the same round, the dealer will first pay the player farthest on his right and then move counter-clockwise to pay other players.

As regulatory procedures permit, this policy can be replaced by casino internal controls.
