

This Forecast Template is for the bingo operator's use for bingo forecasting and planning. It may be also used to prepare reports of actual results.

In order to use this Forecast Template Tool for bingo operations:

1. Open the file.
2. Enter the gross receipts and prize amounts.

The net receipt figure is computed for you.

3. Enter expenses (and any rental income).

Total expenses and net income are computed for you.

4. Enter net income from retail sales, net income from drawings, and net income from amusement games.
5. Enter attendance.

Payout percentage, expense percentage, and net income percentage are computed for you.  
Required adjusted cash flow and actual adjusted cash flow are computed for you.
