RE: Bahama Bonus Blackjack – Submission #2212

Dear Ms. Zarach,

We have reviewed the changes made to your “Bahama Bonus Blackjack” card game. Based on our review of the documentation we received from Bally Technologies, the Washington State Gambling Commission will approve the changes made to your game under the conditions listed below:

The game shall be played and operated under the terms and conditions set forth under the “Bahama Bonus Blackjack” rules of play you provided and are enclosed.

Commercial Card Rooms

- Commercial card room operators seeking to operate this game must first submit their internal controls and receive approval from the Commission prior to implementing.
- Manufacturers and distributors of graphic layouts and/or any other equipment associated with the game must be licensed by the state prior to the sale of the equipment.

Tribal Casinos

- Each Tribal Gaming Operation must request and obtain approval from their respective Tribal Gaming Agencies (TGA). Before TGA allows your game to operate, they will seek concurrence from our agency as well.
- In addition to your approved rules, the Tribal submission to us must include all supplemental information required by Tribal-State Compact Appendix A, Section 18.
- Manufacturers and distributors of graphic layouts and/or any other equipment associated with the game must be certified by the state and licensed by the Tribe prior to the sale of the equipment.

Any modifications to this game may affect this approval. Contact the Commission should you contemplate modifications. If you have any questions on commercial implementation, please contact Brian Lane at (509) 886-6231. If you have any questions on Tribal implementation, please contact Kelly Main at (206) 423-4260.

Thank you for your cooperation and willingness to comply with the gambling laws of Washington State.

Sincerely,

Tina Griffin
Assistant Director
Licensing, Regulation, and Enforcement Division

 - c. 7+ card 21 pays 3 to 1
 - d. 6-7-8 and 7-7-7 mixed suit pays 3 to 2
 - e. 6-7-8 and 7-7-7 suited pays 2 to 1
 - f. 6-7-8 and 7-7-7 in spades pays 3 to 1
 - g. Player has a 7-7-7 suited AND Dealer has a 7 up-card pays \$1,000 (fixed) to the Player and \$50 (fixed) to all other Players in the hand.
5. Other common Blackjack rules that are in use for Bahama Bonus Blackjack are as follows:

 - d. 5, 6 or 8 deck shoe
 - e. Hit soft 17 or Stand on all 17's. Redoubling is only allowed on Hit soft 17 version.
6. TriLux Bonus considers the player's first two initial cards and the dealer's up-card. If a player receives one of the winning three-card hands they will win. See payable for odds. TriLux Super 3 (if offered) also considers the first two initial cards the player receives and the dealer's up card, but offers higher payouts. See payable for odds.
 - a. NOTE: The TriLux Super 3 bet CANNOT be wagered unless a TriLux Bonus bet has been placed.

7. Once players and the dealer have two cards, the dealer settles TriLux Bonus and (if offered) TriLux Super 3 wagers in one of two ways.
 - a. When the cards are dealt face up, the TriLux Bonus and (if offered) TriLux Super 3 wagers will be settled immediately after everyone receives their first two (2) cards and dealer's first two cards. Winning TriLux Bonus and (if offered) TriLux Super 3 wagers will be paid and losing wagers will be picked up in order of placement from the dealer's right to left. Then, Bahama Bonus Blackjack play will resume.
 - b. When the cards are dealt face down, the TriLux Bonus and (if offered) TriLux Super 3 wagers will be settled on a hand to hand basis, as the dealer goes from left to right asking for hit/stand determinations.

NEXUS COMMAND

RULES OF PLAY:

1. Bahama Bonus Blackjack offers an optional progressive wager.
2. The bet considers both the player and dealer's initial two cards. If the player and dealer's cards do not have at least a suited pair among their four initial cards, the progressive wager will lose.
3. Paytables are listed separately.
4. The top percentage pays from the payable require the player's two initial cards and the dealer's two initial cards to be four-of-a-kind. All other winning hands are paid directly from the chip tray. See payable for odds.
5. The meter will be reseeded when the 100% award hits. The cost of the reseed has been factored in to the casino's mathematical advantage.
6. To begin each round, players must make their standard blackjack wager. They may also place the progressive wager. Players must place the progressive wagers on the sensor in front of their betting position. The sensor will light up.
7. Once all players place their bets, the dealer will press "START GAME" on the keypad. The sensors will then light up, indicating a progressive wager. The dealer will then remove all progressive bets from the table.
8. The dealer then follows house procedures for dealing Bahama Bonus Blackjack.
9. After the dealer has completed the initial deal and revealed their up-card, the casino has the option to resolve the progressive immediately, or resolve the standard Bahama Bonus Blackjack and progressive wagers at the same time. Follow the procedure in the next section for reconciling percentage pays from the progressive meter.

10. Progressive winners:

- a. The percentage pays are paid from the progressive jackpot shown on the progressive meter.
- b. Other hands are paid from the tray; they do not come off the meter.
- c. In the event more than one progressive meter pay hits during the same round, the dealer will first pay the player farthest on the right and then move counter-clockwise to pay other players. As regulatory procedures permit, this policy can be replaced by casino internal controls.
- d. When a player has a progressive winner, the dealer will select the player spot corresponding to the player with the winning progressive hand. The dealer will then press the appropriate hand button on the display. (If the hand button is pressed by accident, pressing it again will turn it off.)
- e. The dealer shall then contact a supervisor.
- f. Once the casino verifies the progressive win, the supervisor will press the confirm button. To complete the action, a Supervisor or Executive card (depending on jackpot level) swipe is required. This records the win onto the Game Manager computer and adjusts the meter appropriately for the prize won. House procedures are then followed for paying the prize. (Reviewing the monitor connected to the Game Manager will show the prize amount to be paid, and pressing the “money bag” icon will print a win page, which can be used to help record the payout for accounting.)
- g. When the dealer reconciles all action, he presses “END GAME.” This resets the system to begin the next hand.
- h. Once the Supervisor or Executive card (depending on jackpot level) is swiped the prize is logged into Game Manager. If the progressive pay needs to be backed out at this point, the award will need to be manually backed out using the Game Manager manual adjustment feature.

PROGRESSIVE SYSTEMS FLEXIBILITY and RECOMMENDATIONS:

- Progressive meter contribution
 - When using a pay table in which all payouts are deducted from the meter, we recommend utilizing the system to configure meter contribution rates anywhere between 0-100%.
 - Most pay tables with this style of math are designed to grow over time when a contribution rate of 70% or more is used. If less is contributed, the risk of the meter “running dry” increases.
 - When using a pay table in which only the progressive (percentage) pays are deducted from the meter, we recommend only reducing the pre-configured meter contribution rate if any changes are made. Adjusting the contribution rate above the pre-configured value would reduce the mathematical house advantage of the wager.

- Reserve contribution
 - We recommend contributing a small portion of each progressive wager to the reserve. This amount will be added on to any configured seed amount after a 100% award is given, and will help reduce the drop in play expected after a jackpot hits.
 - We do not recommend eliminating a seed amount entirely and using the reserve as the only seed mechanism. All games present a certain likelihood of back-to-back awards, and this method runs the risk of restarting the meter at a very low amount in that case.

- Seed amount
 - We recommend using the pre-configured seed amount in the system. This amount is specific to the pay table selected for use, and is designed to offer a reasonable starting point that works with the pay table’s math.
 - If any changes are made, we recommend the seed amount to be at least as large as the largest “fixed” award on the pay table.
 - We do not recommend configuring a \$0 seed amount.
