Re: Snow Down Amusement Game

Dear Mr. Berger,

Thank you for submitting the Snow Down amusement game, manufactured by Jennison Entertainment Technologies, to us for review. We have completed our review.

It is my understanding the game plays as follows:

Snow Down is a one or two player redemption game where the object is to try and catch "snow" within a certain period of time to win tickets. When the game starts, foam pellets are blown inside the cabinet for a period of 45 seconds. A series of different fans will alternate to blow the snow in different directions. The player has the ability to move a tube inside the game to collect as much snow as possible within the time permitted. The more snow the player collects, the more tickets that are won.

The Snow Down game meets the definition of an amusement game (RCW 9.46.0201) and is approved for use as a Group 5 Hand/Eye Coordination (WAC 230-13-035) amusement game in Washington State.

Please be advised that any modifications to the Snow Down amusement game software or associated equipment must be provided to us for additional testing and review. In addition, amusement games operated in Washington must not have settings that allow the operator to control the outcome of the game (auto percentaging). The approval of this equipment may be rescinded at any time if problems are found by the Commission or changes to the Washington Administrative Code (WAC) impact this approval. If you have any questions or concerns, please contact Sonja Dolson at (253) 671-6283.

Sincerely,

Mark Harris
Assistant Director
Field Operations Division

FEATURES:

- SINGLE PLAYER OR TWO PLAYER MODE
- DUAL 22 INCH MONITORS
- CUSTOM THEMING WITH ONE OF A KIND MOVIE STYLE TRAILERS
- 'BLIZZARD' & 'SNOW DOWN' EFFECTS TO INCREASE COMPEITION & SKILL
